

MAREX 330 Scandinavia

For longer cruising with
family and ***friends***

The legendry Scandinavian family boat

Space and family

The Marex 330 is designed as a new version of our popular well-established Scandinavia model. It fulfills our existing customer's wishes for the next generation of the same concept and is designed for today's highest expectations for comfort and accommodation.

The new 330 Scandinavia combines great performance with a focus on space. Being our most innovative build yet, the boat is full of pleasant surprises and smart solutions that guarantee an extraordinary experience on the water.

Safety and practicality

Built to perfection in the smallest details, the 330 Scandinavia has won the BOB Award 2021 in the Best for the Family category, European Powerboat of the Year 2022, Motorboat of the Year 2023, and in addition several best boats of the show prizes. An accomplishment no other boat producer has achieved.

Safety and the feeling of security dictate all decisions on board. The side walkways are wide enough to move comfortably without feeling constrained, and the protective rails are raised for a greater safety feeling.

Comfortable for any occasion

Generous sitting areas

The 330 Scandinavia features spacious outside and inside sitting areas. A sliding door between the cockpit and salon can combine these areas into a single zone. This makes the boat suitable for various social settings and an absolute pleasure to cruise in.

Inside the salon, you can find two sofas, a folding table and an additional pull-out stool. In the outside area boat features a U-shaped seat with a dining table for 6-8 people that can double in size and has integrated cup holders in the centre.

Smart Canopy Solution

The Marex Advanced Canopy Solution is the absolute quickest on the market and even simpler than before. The canopy is stored in the targa arch. The updated single mount system allows the quick fastening of the cockpit canopy.

The boat has also a soft roof in the aft and a front hardtop for fully convertible options. Just a minute from completely closed to a fully open boat. This user-friendly innovation helps to extend the summer season in Northern areas (using heater), or makes boating more comfortable in warm climates (with AC).

Chosen by **experience**

Gourmer Cooking

The kitchen features everything the most passionate cooking enthusiast could ever need, including an induction/gas hob, oven, coolbox, fridge and sink. In addition, the space under the sofa in the aft cockpit can be used for an additional refrigerator or an ice maker. An optional grill can also be mounted on the swim platform.

Relationships that matter

MAREX

KING OF THE SEA

The memories we make with
our family is everything

Some features

- Pilot door
- Advanced Cockpit Canopy Solution
- Swim platform bench
- Floating sunpad
- Solar panels, or Mounting rack
- Flip-over co-pilot bench
- Double dashboard display
- Sliding aft softroof and salon hardtop
- Generous storage compartments, including fender storage
- Sliding door to close the salon

Custom options

Cockpit

The aft cockpit sitting group can be delivered with several options:

- Extra fridge
- Icemaker
- Extra sofa
- Extra storage
- Open deck

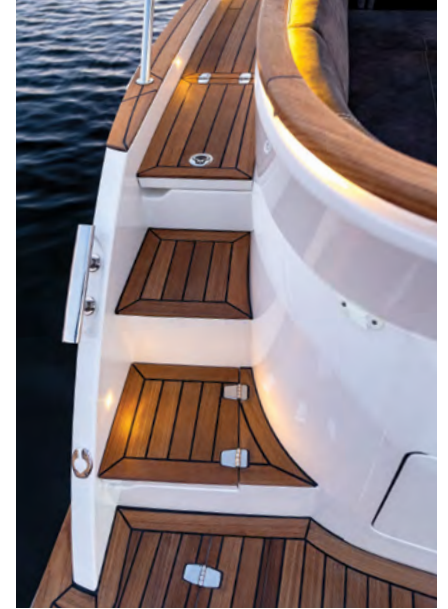

Swim platform

An innovative flip-down seat on the swim platform allows to sit and enjoy the sea view or dry and take a breath after a swim. The deck shower is handily located behind the seat.

As several marinas and lakes have restrictions on boat size, the 330 Scandinavia can be delivered with either a long version (119 cm/ 4ft), or a short (68 cm/ 2ft) swim platform.

Wide range of engines

The 330 Scandinavia can be equipped with various single or double option, shaft or sterndrive engine configurations. The cruising speed is from 23 to 30 knots and maximum speed is from 28 to 38 knots.

Steer towards
your dreams

Unique innovative solutions

Pilot door

The sliding door has been prompted by the owner's feedback and it provides the quickest access from the helm to the starboard passageway. Docking and handling without crew have never been so easy!

Extended dashboard

A new helm with a double dashboard allows the 330 Scandinavia to be more skipper-oriented. Mounted here are two Simrad touch screens, which provide all necessary information and are easily viewed no matter if the skipper is sitting or standing.

Solar panels or Mounting rack

Efficient solar panels can optionally be mounted on the roof with up to 900 watts of charging power. Enough to keep the boat without shore power over an extended period of time even with the fridge and freezer always-on. The roof can come with an optional mounting rack for adventurous cruising. A place for bicycles, paddleboards or kayaks.

Flip-over seat

The dinette seat can be turned into a co-pilot navigator bench. The flip-over backrest allows to the passengers to sit in the driving direction, while enjoying the cruise in the salon.

Floating Sunpad

The sunpad on the foredeck can double as a floating water toy, creating a private beach for the whole family to enjoy.

Suitable for longer trips

Make yourself at home

The 330 Scandinavia demonstrates the Marex quality interior design in all its splendour. A boat suitable for longer trips with family, or as a day cruiser to spend time with friends.

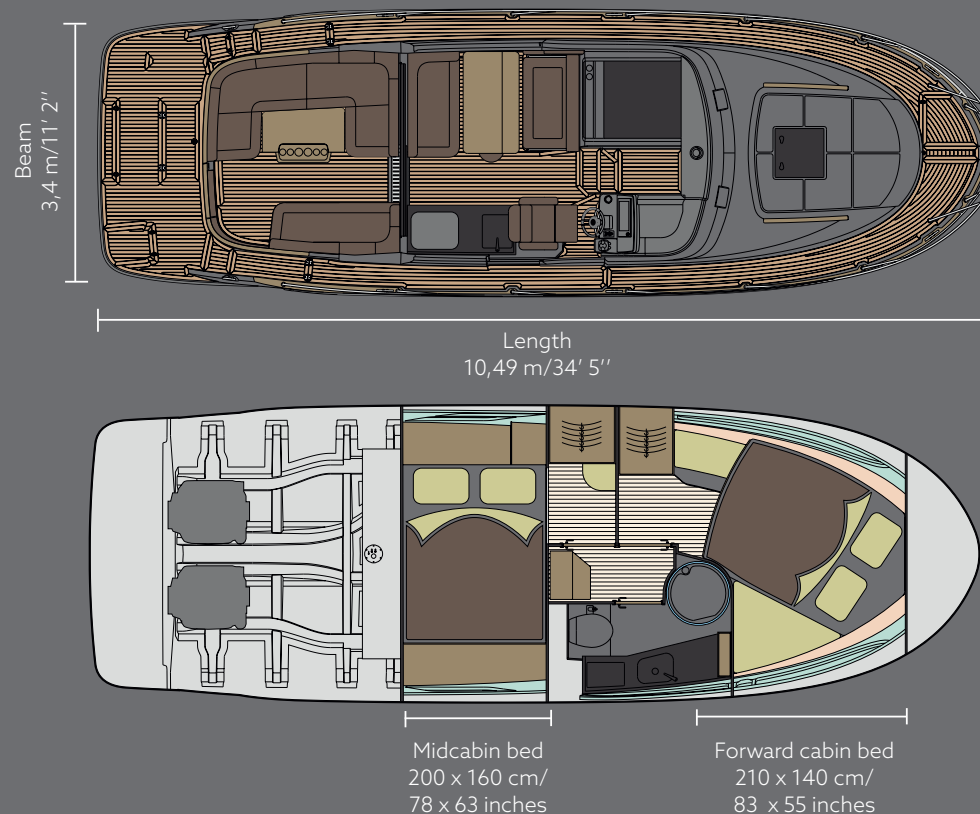

There are two cabins on the lower deck and also four additional sleeping places in the salon and cockpit. The forward cabin in the bow makes the most of the available space with a large double bed and a bedside sofa, while the height of the ceiling reaches almost 2 metres/6' 7".

The space under the bed is fully utilised, and the bed can be lifted to access a huge storage under.

The midship cabin features a big double bed of 200 x 160 cm/ 78 x 63 inches. Both cabins have large windows that provide a fabulous connection with the sea and several openings for good ventilation

The smart deck layout allowed us to create a spacious bathroom with a separate shower and a generous standing height.

TECHNICAL SPECIFICATION

Length: 10,49 m/34' 5"

Beam: 3,4 m/11' 2"

Depth: 0,9 m/ 2' 11" (single);
